

NORPAC ORCA DIGITAL LASER BOND

SHARP, BOLD, HIGH-SPEED WEB PRINTING

Orca® Digital Bond is designed for enhanced performance on high-speed inkjet and laser digital web presses, yielding sharp, bold images on a surface-treated, smooth substrate suitable for everyday and premium jobs.

Versatile Printing

- Available in 20 and 24 lb. bond basis weights
- 92 brightness for excellent contrast
- Smooth finish for fine detail clarity
- Surface treated for superior inkjet performance
- Quick-drying to avoid smudges and smears

Excellent Legibility

- For use with inkjet and laser web presses
- Superior pigment-based inkjet performance
- Suitable for dye-based inkjet systems

Sustainable Manufacturing

- Made in the U.S.A. by NORPAC in Longview, WA
- All major fiber certifications available
- Acid-free for archival permanence and extended document life
- Elemental chlorine free (ECF)
